Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. New corrected drawings are required in this application because drawings are informal and do not clearly depict the claimed invention. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 11-15, 20, 28, 29, 30, 32, 33, 34 & 35 are rejected under 35 U.S.C. 102(b) as being anticipated by USP 3,674,396 to McCormick (herein referred to as "McCormick").

McCormick teaches a biological specimen and embedding apparatus inside a capsule (hollow) comprising an open-topped box-like open mold having a perforated (tear lines) bottom wall and a removable perforated cover. The cover is removed from the sidewall via a handle (col. 3, lines 68-70). The apparatus is made from plastic (col. 3, line 50). The cover is fitted to the rest of the apparatus by snapping the latch members (col. 3, line 55). The method of use of the apparatus is containing a biological sample therein; placed into a solution of dehydrating agents

or clearing agents (embedding media) to prepare to be embedded in paraffin (col. 3, lines 50-67).

The apparatus defines the shape of the paraffin body when hardened to maintain the original orientation of the sample (col. 4, lines 37-39). The specimen is then ready for the microtome to be sectioned (col. 47-60).

Allowable Subject Matter

4. Claims 16-19, 22-27, 31 & 36-38 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The following is a statement of reasons for the indication of allowable subject matter: the prior art does not teach or suggest an apparatus such as instantly claimed comprising a pre-formed foam block or agarose.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Monique T. Cole whose telephone number is 571-272-1255. The examiner can normally be reached on Monday-Thursday from 6:30 A.M. to 4:00 P.M.
